

The 8th Global Network Forum on Infection and Immunity : Microbiome

Free to participate

Poster Session

Jan. 10, 2020

Seminar Room, Chiba University Hospital

Oral Presentation

Jan. 11, 2020

Garnet Hall, Chiba University Hospital

Elaine Y. Hsiao (UCLA, USA)

“Host-microbiome interactions through the gut serotonergic system”

Hiroshi Ohno (RIKEN, Japan)

“Gut microbiota and autoimmune diseases”

Noah Palm (Yale University, USA)

“Illuminating the ‘dark matter’ of the bioactive microbiota metabolome ”

Andreas Diefenbach (Charite University, Germany)

“Role of the innate immune system in adaptation of vertebrates to their environment”

Jakob von Moltke (University of Washington, USA)

“Intestinal Tuft Cells: Sentinels and Effectors of the Type 2 Immune Response”

Nobuo Sasaki (Keio University, Japan)

“The study of epithelial crosstalk at the host-microbes interface using organoid”

Yuichi Hongoh (Tokyo Institute of Technology, Japan)

“Multi-layered symbiotic system in the termite gut”

Takahiro Matsuki (Yakult Central Institute, Japan)

“Key genetic factors for human milk oligosaccharides utilization affect infant gut microbiota development”

<Organizing Committee>

Hiroshi Ohno (RIKEN)

Chihiro Sasakawa (Chiba University)

Takahiro Matsuki (Yakult Central Institute, Basic Research Department)

Yoshiyuki Goto (Chiba University)

Mitsutoshi Yoneyama (Chiba University)
